LONDON ROYAL
A C A D E M Y

Course Introduction

This 5-day intensive course explores the cutting-edge financial solutions transforming the insurance industry. Participants will gain a deep understanding of emerging technologies, innovative business models, and disruptive trends that are reshaping the insurance landscape.

Training Method

- Pre-assessment
- Live group instruction
- Use of real-world examples, case studies and exercises
- Interactive participation and discussion
- Power point presentation, LCD and flip chart
- Group activities and tests
- Each participant receives a binder containing a copy of the presentation
- slides and handouts
- Post-assessment
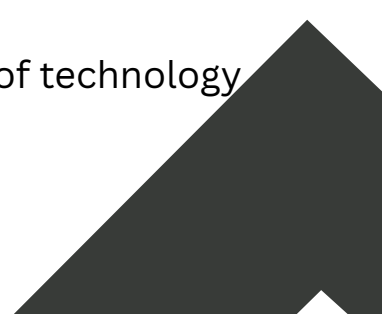

Course Objectives

Upon successful completion of this course, participants will be able to:

- Understand the key trends and technologies disrupting the insurance industry (e.g., AI, IoT, blockchain, big data, cloud computing).
- Analyze the impact of these technologies on insurance products, services, and operations.
- Develop and evaluate innovative insurance products and services, such as usage-based insurance, parametric insurance, and micro-insurance.
- Explore the potential of insurtech and fintech solutions in the insurance industry.
- Understand and address the challenges and opportunities presented by the evolving regulatory and competitive landscape.
- Develop strategies for leveraging technology to improve customer experience, enhance operational efficiency, and mitigate risks.
- Identify and evaluate emerging business models for the insurance industry, such as platform models and ecosystem partnerships.

Who Should Attend?

This course is designed for a diverse audience, including:

- Insurance professionals (underwriters, actuaries, product managers, claims adjusters)
- Insurance executives and leaders
- Fintech professionals
- Technology professionals working in the insurance industry
- Consultants and advisors to the insurance industry
- Anyone interested in the future of insurance and the role of technology in shaping the industry
