Course Introduction

This 5-day intensive course explores the transformative impact of Artificial Intelligence (AI) and the Fourth Industrial Revolution (Industry 4.0) on Human Resource Management (HRM). Participants will gain a deep understanding of how AI tools and emerging technologies are reshaping HR practices, enabling data-driven decision-making, and driving organizational success in the digital age.

Training Method

- Pre-assessment
 - Live group instruction
 - Use of real-world examples, case studies and exercises
 - Interactive participation and discussion
 - Power point presentation, LCD and flip chart
 - Group activities and tests
 - Each participant receives a binder containing a copy of the presentation
 - slides and handouts
 - Post-assessment
- 

Course Objectives

Upon successful completion of this course, participants will be able to:

- Understand the core principles of Industry 4.0 and its implications for HRM.
- Identify and analyze the impact of AI tools on various HR functions.
- Implement AI-powered solutions for recruitment, talent management, and employee engagement.
- Leverage HR analytics to gain actionable insights and optimize HR processes.
- Understand the ethical considerations and challenges associated with AI in HRM.
- Develop strategies for upskilling and reskilling the workforce to adapt to the changing demands of Industry 4.0.
- Create a data-driven HR culture that fosters innovation and efficiency.
- Design and implement AI-powered HR solutions that align with organizational goals.
