

Renewable Energy & Engineering

Renewable Energy and Sustainability environment

- Location: London
- Date: From 23/6/2025 To 27/6/2025
- Investment: \$5950 (Excluding VAT)

**LONDON ROYAL
ACADEMY**

WWW.LONDONRA.COM

Course Introduction

This 5-day intensive course provides a comprehensive overview of renewable energy technologies and their critical role in fostering environmental sustainability. Participants will explore the scientific, economic, and policy aspects of renewable energy, examining how these technologies contribute to mitigating climate change and promoting a sustainable future. The course emphasizes the interconnectedness of energy systems and environmental health, equipping participants with the knowledge to drive positive change.

Training Method

- Pre-assessment
- Live group instruction
- Use of real-world examples, case studies and exercises
- Interactive participation and discussion
- Power point presentation, LCD and flip chart
- Group activities and tests
- Each participant receives a binder containing a copy of the presentation
- slides and handouts
- Post-assessment

Course Objectives

Upon successful completion of this course, participants will be able to:

- Understand the fundamental principles of various renewable energy technologies (solar, wind, hydro, geothermal, biomass).
- Analyze the environmental benefits of renewable energy and its role in climate change mitigation.
- Evaluate the sustainability of different renewable energy sources and their life-cycle impacts.
- Understand the economic and policy factors influencing the adoption of renewable energy.
- Assess the challenges and opportunities associated with integrating renewable energy into existing energy systems.
- Develop strategies for promoting renewable energy and sustainable energy practices.
- Understand the role of renewable energy in achieving sustainable development goals.
- Communicate effectively about renewable energy and sustainability to diverse audiences.

Who Should Attend?

This course is designed for a broad range of professionals and individuals, including:

- Environmental Scientists and Engineers
 - Energy Professionals (engineers, planners, analysts)
 - Policy Makers and Government Officials
 - Business Leaders and Sustainability Managers
 - Educators and Researchers
 - Students in Environmental Science, Engineering, and related fields
 - Anyone passionate about sustainability and renewable energy
- 

Course Outline

Day 1: Foundations of Renewable Energy and Sustainability

- Introduction to Renewable Energy Sources: Overview and Potential
- The Environmental Impacts of Fossil Fuels and Climate Change
- Principles of Sustainability and Sustainable Development Goals (SDGs)
- Life Cycle Assessment (LCA) of Energy Technologies
- The Role of Renewable Energy in a Sustainable Future

Day 2: Solar and Wind Energy Technologies

- Solar Photovoltaic (PV) Systems: Principles, Applications, and Advancements
- Concentrated Solar Power (CSP) Technologies
- Wind Turbine Technology: Onshore and Offshore Wind Energy
- Grid Integration of Solar and Wind Power
- Energy Storage Solutions for Intermittent Renewables

Day 3: Hydro, Geothermal, and Biomass Energy

- Hydropower: Traditional and Pumped Hydroelectric Storage
- Geothermal Energy: Direct Use and Power Generation
- Biomass Energy: Biofuels, Biopower, and Biogas
- Sustainable Biomass Practices and Land Use Considerations
- Environmental Impacts of Hydropower and Geothermal Energy

Course Outline

Day 4: Integrating Renewable Energy into Sustainable Systems

- Smart Grids and Distributed Energy Resources
- Energy Efficiency and Conservation Strategies
- Renewable Energy Policies and Incentives
- Economic Analysis of Renewable Energy Projects
- The Role of Renewable Energy in Urban Sustainability

Day 5: Challenges, Opportunities, and the Future of Renewable Energy

- Environmental Impacts of Renewable Energy Deployment (Land Use, Wildlife, etc.)
 - Social and Economic Considerations in Renewable Energy Projects
 - Climate Change Adaptation and Resilience in the Energy Sector
 - The Future of Renewable Energy Technologies and Innovations
 - Case Studies and Best Practices in Renewable Energy Implementation
 - Developing Action Plans for Promoting Renewable Energy and Sustainability
- 

Registration & Payment

Complete & Mail to London Royal Academy or email
registration@londonra.com

Registration Form

- Full Name (Mr / Ms / Dr / Eng)
- Position
- Telephone / Mobile
- Personal E-Mail
- Official E-Mail
- Company Name
- Address
- City / Country

Payment Options

- Please invoice me
- Please invoice my company

Terms & Conditions

Complete & Mail to London Royal Academy or email
registration@londonra.com

Cancellation and Refund Policy

Delegates have 14 days from the date of booking to cancel and receive a full refund or transfer to another date free of charge. If less than 14 days' notice is given, then we will be unable to refund or cancel the booking unless on medical grounds. For more details about the Cancellation and Refund policy, please visit

www.londonra.com/terms-and-conditions/

Registration & Payment

Please complete the registration form on the course page & return it to us indicating your preferred mode of payment. For further information, please get in touch with us

Course Materials

The course material, prepared by the LRA, will be digital and delivered to candidates by email

Certificates

Accredited Certificate of Completion will be issued to those who attend & successfully complete the programme.

Travel and Transport

We are committed to picking up and dropping off the participants from the airport to the hotel and back.
